

## Make a gift box

### What You Need:

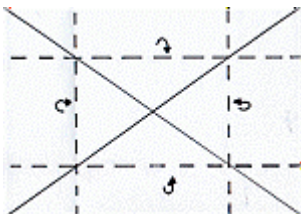

- 2 pieces of card (same size) or an old Christmas card
- A ruler or straight edge.
- A pencil.
- A pair of scissors.
- Crayons or markers for decorating.

### What You Do:

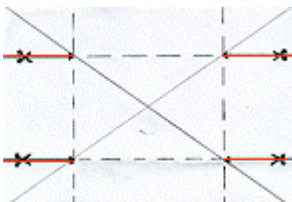

1. First, get an old greeting card.
2. Next, cut it in half at the fold.
3. Using your ruler, make an "X" on the card by drawing two lines that cross at the centre of the card.  
(see diagram).

4. Fold the edges of all four sides of the paper over to the middle of the cross.  
(see diagram)

5. Cut the red lines as shown in the diagram.

6. Fold the tabs in to create a box and tape or glue the box together.
7. To create a lid for the box, do the same as above, only instead of folding the edges to the point of the cross, leave a small gap at the centre so the lid will be slightly larger than the bottom.
8. Decorate as you choose and fill with tissue paper.
